Foreword

The drive to use data for decision making at all levels of governance in Uganda is increasingly being embraced. The Ministry of Gender, Labour and Social Development (MGLSD) has the legitimacy grounded on the National Development Plan, Sector Strategic Plan for Statistics (SSPS), National Strategic Programme Plan of Intervention for OVC (NSPPI-II) and other relevant sector guidelines to base responses to child vulnerability on timely information for policy formulation, decision making and planning. Reliance on data increases certainty of decisions and proficient judgement, which is a basis for reasoned action for effective child care and protection. As the saying goes; evidence is power and the availability of evidence should empower decision support systems in all levels of governance. Lately, the MGLSD has graded performance of districts using the “league table” based on data generated. However, there is need to respond to real issues of child vulnerability by converting data into information and knowledge. Data is pivotal to evidence-based decisions regarding policy implementation and deployment of logistics. With scarcity of resources, it is important that evidence informs decisions for the wise use of resources. Data is key to systematic monitoring of progress in the achievement of the NSPPI-II by ensuring that decisions are based on objective and high quality evidence.

The MGLSD greatly appreciates the support of the United States Government President’s Emergency Plan for AIDS Relief (PEPFAR) and other development partnerships, which have contributed to improved quality of lives of vulnerable children in Uganda. Appreciation is also extended to the implementing partners, OVC service providers and local governments for their contributions towards OVC services provision.

The production of this OVC statistical report is a commitment of the Ministry to provide accountability and evidence to support decision making and planning.

Pius Bigirimana,

Permanent Secretary, Ministry of Gender, Labour and Social Development

Acknowledgement

The production of this Orphaned and Other Vulnerable Children (OVC) statistical report for the financial year 2017/2018 was a combination of effort from different stakeholders spearheaded by the Planning and Policy division, Information Technology Unit and the National OVC Implementation Unit of the ministry.

The Ministry would like to express profound gratitude and appreciation to all OVC actors and OVC MIS data entrants who helped with data capture into the system hence facilitating the process of Analysis. In addition, the ministry also thank the team from UBOS for assisting in validating the analysis of this report. Furthermore, the role played by Implementing Partners like UNICEF, PLAN International, MILD MAY Uganda, METS Project, CDC, SITES, BAYLOR Uganda, RHSP and others was very vital for the effective implementation of the OVC programme. Service Providers such as (CSOs), District Community Based Services Departments (PSWOs, DCDOs) of the districts who handle issues of OVC in the Districts are equally recognized.

Gratitude is also extended to the Technical Working Group (TWG) that worked tirelessly to ensure that report is finalized.

Executive Summary

The Ministry of Gender, Labour, and Social Development has come up with an annual statistical report on Orphans and Other Vulnerable children in Uganda for FY 2017/18. This report provides information that will guide policy formulation, planning and timely decision making.

During the period under review, the total number of OVC and OVC HHs that received services across the six Core Programme Areas (CPAs); Economic Strengthening, Food Security and Nutritional Support, Health, water, sanitation and Shelter, Education Support, Psychosocial and Basic Care, and Child Protection and Legal Support amounted to **5,643,654** of which **5,052,395** (89.5%) received Social Services like Food security & Nutrition, Psychosocial support & basic care, Health, water, Sanitation & Shelter, and Education, **165,668** (2.9%) received Economic services and **425,591** (7.6%) were provided with Legal services. In addition, **561,641** OVC received services in 3 or more CPAs of which 53% were females and 47% males.

During the period under review, **1,389,313** OVC House Holds (HHs) were provided with support of which, **952,555 (68.6%)** HHs were provided with Social services which included; Food security & Nutrition, Health, Water, Sanitation & Shelter, Psychosocial Support & Basic Care and Education and **436,758 (31.4%)** HHs were provided with Economic strengthening.

Further more, at regional level, Central Region benefited most with **2,128,983** OVC served followed by Eastern, Western and Northern with **1,104,739**, **1,018,809** and **710,941** OVC respectively and least number was registered in West Nile region with **246,008**. This service provision at regional levels doesn't relate positively with the incidence of poverty in these regions. For instance, based on 2016/17 UNHS, it was estimated that Eastern region (35.7%) of the people are poor, Northern (32.5%), Western (11.4%) and Central (12.7%). This implies that Northern and Eastern regions should have been served most since of the vulnerable children are included in the above poverty statistics. There is therefore need to reprogramme the OVC services by serving more OVC in the Northern and Eastern regions as opposed to Central and Western regions. This implies that government should deploy more CSOs in these regions.

The analysis further indicates that whereas each service provider implemented at least 3 CPAs, some CPAs were implemented more than others. The most implemented CPA was Psychosocial Support and Basic care, undertaken by most of the service providers, followed by Education and

Health, Water and Sanitation respectively. Food Security and Nutrition, Economic Strengthening were undertaken by almost same proportion of service providers, while the least implemented CPA was child protection and legal support. Whereas Psychosocial Support and Basic care were undertaken by most of the service providers, there is need to provide more of Economic Strengthening, Education and child protection and legal support to ensure long term and sustainable impact on the lives of the OVC.

During data analysis and report compilation, it was greatly observed that both the quality and quantity of OVC data had improved greatly compared to previous data that was being produced. This was because of the comprehensive and routine data review meetings and refresher trainings that were conducted to improve on the data management practices and skills of officers in the field of OVC programming. However, the technical team identified the following as key challenges: OVC individuals served did not have unique identification numbers and this makes tracking of these individuals across the service delivery points difficult, OVC Annual reports had a reporting gap for the period 2016/17 and even the produced OVC annual reports for 2014/15 and 2015/16 were shared only with the TWGs and not all other stakeholders. Data was not disaggregated by disability, and there were also cases of none or late reporting by some CSOs.

1.0 CHAPTER ONE

1.1 Introduction

Over the 10-year period of implementation of the two National Strategic Programme Plan of interventions for OVC, that is; the NSPPI-1 and NSPPI-2, the MGLSD and Development Partners have been profoundly challenged by the lack of reliable data and the low affinity to consume real-time data. The absence of quality data and OVC annual reports has not only affected rationalization of interventions and advocacy for resource allocation, but equally overwhelmed Programme monitoring. The OVC annual reports for 2014/15 and 2015/16 were produced and shared with only with TWGs and the Annual report for 2016/17 was never produced.

In an effort to strengthen OVCMIS reporting, the Ministry of Gender, Labour and Social Development which is mandated to oversee all issues concerning children in the country in conjunction with different implementing partners (IPs) have been conducting a number of trainings in data management to improve skills of their staffs who directly or indirectly participate in OVC activities. It's through these trainings that the quality and quantity of OVC data has improved from time to time in different districts in Uganda.

However, OVC programming in Uganda still faces some challenges. These include inadequate computers, inadequate skills by some district officials to enter, analyze and interpret data, Illiteracy of the caregivers and some household members who exaggerate the needs of OVC because of the high level of expectations.

1.2 Situational Analysis

Uganda faces a growing challenge of care and protection of Children, whose population is estimated at 19.03 million children below the age of 18 years. Of these children, 11 % have been orphaned and 44 % either critically or moderately vulnerable. According to the Social Development Sector Plan (SDSP)-2015/16-2019/20; vulnerability relates to lack of security, susceptibility to risk and/or exploitation. It is a measure of resilience of individuals, households and communities to withstand any shock that might result in increased poverty.

According to the findings at household level, the distribution of the number of orphans per household gives an insight of the magnitude of the problem for appropriate intervention. Out of 8.5 million households in the country, 1.3 million had an orphan, constituting about 15 percent of all households. Overall, the total number of households with one orphan has slightly increased

from 53 percent to 55 percent between the 2012/13 and 2016/17 survey undertakings. On the other hand, those households with two orphans almost remained the same. At regional level, Karamoja sub-region had the highest proportion of households with four or more orphans (24%) compared to other sub-regions. (UNHS 2016/2017)

Orphan hood in Uganda have been slightly on the decrease across the three survey periods from 15% (UNHS 2005/06) to 11% (UNHS 2016/2017). Orphan hood in female headed households was at 25% compared to male headed households at only 6%. The death of a father has been a major explanatory factor for orphan hood for the different background characteristics compared to death of a mother or both parents. Overall, a minimum of 2,048,000 (14%) of the children aged 5-17 years were in child labour. The findings also show that, close to half of the old persons (42%) had never been to school and these were predominantly females (57%) compared to their male counterparts (23%). The majority of the widows (86%) were household heads implying they were major decisions takers in the household, and probably playing a lead role as well in looking after other household members.

1.3 key concepts in OVC programming

- An Orphan is a child below the age of 18 years who has lost one or both parents.
- A vulnerable child is that child who is suffering and or is living in circumstances where he/she is likely to suffer any form of abuse or deprivation and is therefore in need of care and protection.
- The vulnerability index of an individual OVC is a measure of the exposure of OVC population to their inability to provide for themselves basic necessities of life. Typically, the index is a composite of multiple quantitative indicators that via some formula, delivers a single numerical result (**source: NSPPI-2.**). A high vulnerability index in a region or district indicates that the OVC population in this particular place are more vulnerable and are in great need of support and the reverse is true.
- OVC Enrolment; OVC enrolment is a process of registering them into the OVC programme to enable them to be eligible to benefit from the OVC services. It is done to provide background information and vulnerability index of an individual child using child enrolment and monitoring card (OVC Form 008).

- OVC Registration process; is done using OVC MIS Integrated Register (OVC form 004), which also documents services received by the OVC/HH. The OVC is enrolled first then later he/she is registered into the OVC MIS register.
- Criteria of Service provision; OVC/HH is selected to benefit from OVC programme basing on the level of Vulnerability. Vulnerability is categorized into two as described below;

Critically vulnerable children

- ✓ Orphans who are living in extremely difficult circumstances and are exposed to risks
- ✓ Children infected and affected by HIV&AIDS
- ✓ Children with disabilities living in extremely difficult circumstances and are exposed to risks.
- ✓ Children in worst forms of child labour (sex workers, bonded labour, illicit activities, work that stops school attendance, cattle rustling, and other intolerable forms of work)
- ✓ Children experiencing various forms of abuse and violence e.g. survivors of sexual violence; children in abusive homes or institutions.
- ✓ Street children/abandoned children/neglected children
- ✓ Children in contact with the law
- ✓ Children from child headed households
- ✓ Children who are engaged in armed conflict as captive or child soldiers
- ✓ Any other category of children who are assessed to be in need of immediate care and protection

Moderately vulnerable children

- ✓ Out of school children; Teenage mothers;
- ✓ Children in poverty stricken (impoverished) households
- ✓ Children involved in hazardous work (other than worst forms of child labour).
- ✓ Children living with the elderly persons
- ✓ Children in Hard to Reach Areas;
- ✓ Children in fishing communities

1.4 Report Structure

This report is comprised of four chapters; chapter one, chapter two, chapter three and chapter four.

Chapter one presents the introductory information of this report, evolution of OVC, milestones achieved in OVC data management, a few challenges affecting OVC program.

Chapter two describes the methodology that was used during this report's data compilation, analysis and presentation (data collection tools, data entry, data extraction and cleaning, analysis and presentation, compilation and report scope).

Chapter three presents the statistical findings and analysis for OVC and OVC HHs registration and Enrolment, services offered to OVC and OVC HHs, graduation in the OVC programme and geospatial distribution and presentation of data on maps.

Lastly chapter four is comprised of different challenges faced during the report compilation and also recommendations for the betterment of OVC service delivery, data management, and usage.

2.0 CHAPTER TWO

This chapter describes the methodology used while compiling up the OVC Financial Year 2017/18 Report.

2.1 Methodology

2.1.1 Data collection tools used for the collection of OVC data

Data from the households is collected using a variety of tools which include; Household vulnerability prioritization Form (006), Household vulnerability assessment tool (007), OVC monitoring and enrolment card (008), Integrated OVC Register (004) and OVC MIS quarterly report form (100). The OVC MIS Form (100) being the summary form that feeds into OVC MIS on a quarterly basis, becomes our focal tool of analysis in this report. OVC form 100 reports quarterly numbers of OVC and OVC HHs provided with services whereas Form 004, 006, 007 and 008 are used to assist OVC service providers in prioritizing households for enrolment in OVC programs/support, target and obtain additional in-depth information about a household's level of vulnerability, and measure progression of child vulnerability.

The OVC MIS Form 100 is a summary data collection tool that reports quarterly numbers of individual OVC and HHs provided with services. The tool is used by OVC service providers to collect data on a range of core programme services provided to OVC households and as well, document data on a set of cross cutting indicators.

The tool summarizes data about Economic Strengthening, Food Security and Nutritional Support, Health, water, sanitation and Shelter, Education Support, Psychosocial and Basic Care, and Child Protection and Legal Support provided to the OVC and OVC households.

The form also summarizes data on social workforce strengthening including number of staff and community volunteers trained in OVC programming, number of OVC newly enrolled, newly graduated and number of sensitization events conducted.

2.1.2 Data Entry

Data entry into the OVC MIS was done using OVC MIS form 100 by different service providers/duty bearers including Probation and Social Welfare Officers and sub county CDOs. Data was then entered into the OVC MIS by the authorized users at the community Based services department and other service providers.

2.1.3 Data Extraction and Cleaning

OVC data was extracted from the OVCMIS database covering the period of July 2017 to June 2018. The data was then subjected to thorough cleaning (coding of variables, creating new variables and cross referencing data of the excel sheet with that in the system) processes before embarking on the actual analysis of the data.

2.1.4 Data Analysis and Presentation

Data was analysed in two dimensions that included univariate and bivariate analysis. The univariate analysis involved looking at one variable at a time for instance total number of OVC served, OVC provided with insecticide treated nets and others. Bivariate analysis involved analysis of two variables with the purpose of determining the empirical relationship between them, for instance total OVC registered by district against OVC supported with 3 or more Core Programme Areas (CPAs), geospatial distribution of data was also done to assess the magnitude of service distribution in the country and others. The analysis presented in this report mainly focused on the OVC enrollement and Registration, services offered to OVC and OVC House holds, graduation and data management in OVC programming. The analysis on OVC enrolment, Registration and Graduation was disaggregated by sex so as assess the extent to which the OVC program is gender responsive. Also data for individuals served by Age group was further analysed by summing individuals under 1 year, 1-4 and 5-9 years into one total and also summing all individuals above 18 years. This was done to assess on average who are benefiting more from the OVC programming between the two groups.

Further more, analysis was done based on service category that is; Social, Economic and Legal services across all Core Programme Areas to assess the mangnitude of services provision by regions, to find out which regions benefited more in the OVC programming over the review period and why.

2.1.5 Report Compilation and Dissemination

The planning and policy division took lead in the data compilation, extraction, cleaning and analysis during compilation of the report closely assisted by Information Technology Unit, and the OVC implementation unit of the Ministry. The technical Work Group (TWG) was formed at the ministry to spearhead the report editing, compilation and finalization of the report. The final copy of the report will be disseminated in both soft and hard copies at Regional and National Levels.

2.1.6 Scope

The report covers OVC data from the OVCMIS for the period running from July 2017-June 2018.

The districts serving number (120). OVC that are reflected in this report are one hundred twenty (120) in number.

3.0 CHAPTER THREE:

This Chapter presents the statistical analysis of data for OVC registration and Enrolment, services offered to OVC and OVC HHs and graduation in the OVC programme. The analysis was presented in both tabular, textual and graphical formats.

3.1 OVC Enrollment and Registration

OVC enrolment is done to provide background information and vulnerability index of an individual child and it is always filled during assessment to justify enrollment for support. This is done using child enrolment and monitoring card (OVC Form 008). Registration of OVC is done using OVC MIS integrated register (OVC form 004), it also documents services received. The OVC is enrolled first then later he/she is registered into the OVC MIS register.

The Statistics between enrollment and registration reflects a big service gap. The registered OVC to benefit from services are still very few compared to those enrolled due to inadequate resources.

Table 1: OVC enrolled and registered

Sex	(Enrolled OVC)	(Registered OVC)
Females	217,849	28,083
Male	173,723	25,597
Total	391,572	53,680

Source: OVC Database-MGLSD

3.1.1 Registered OVC by Sex

In 2017/2018, the total number of OVC registered was 53,680 of which **52%** Percent were Females compared to their male counter parts at **48%**. This is because more females are subjected to Gender Based Violence (GBV) than Males and this therefore makes females more vulnerable to qualify for OVC programme than males. Other reasons could be attributed to the fact that most interventions in place tend to give more attention to the girl-child.

Figure 1: Registered OVC by Sex

Source: OVC Database-MGLSD

3.1.2 OVC newly Enrolled Individuals by Age Group

Majority of individuals who were newly enrolled and served in 2017/18 were in the age group of 10 to 14 years at 84,758 followed by children within the age group of 5 to 9 years at 81,013 marking a slight difference of 3,745. However, it should also be noted that children below the age of 1 year were the least enrolled and served at 22,481 (figure 2).

Figure 2: OVC newly enrolled individuals Served by Age Group

Source: OVC Database-MGLSD

The majority of the newly enrolled individuals are within the age category (10-14 Years) and this is due to the effects of child poverty in the community, drug abuse, high rates of school dropouts in primary level of education, child neglect and poor parenting practices that is becoming rampant in many families.

3.1.3 Individuals Served by Age Group

Under the OVC Programme, individuals served include those who are straight orphans and other vulnerable children and their caregivers. The variable “individual served” constitutes both newly enrolled and those who have been getting services.

The highest number of individuals served were within the age group of 10 to 14 (**1,136,526**). These were followed by those within the age group of 5-9 years (**809,340**). The least served OVC were those below the age of 1 year constituting **142,687** children throughout the whole country. Looking at the individual served by age group, the greatest number were in the same age category (10-14 years) (figure 3) and this is due to the effects of child poverty in the community, drug abuse, high rates of school dropouts in primary level of education, child neglect and poor parenting practices that are becoming rampant in many families. The individuals served under 1 year are least served because these are young infants under the care of their parents/guardians and less vulnerable compared to those in other age categories.

Figure 3: Individuals Served by Age Group

Source: OVC Database-MGLSD

3.1.4 OVC Individuals served by Region

This section presents, the total number of OVC individuals served by sex across the six Core Programme Areas (CPAs); Economic Strengthening, Food Security and Nutritional Support, Health, water, sanitation and Shelter, Education Support, Psychosocial and Basic Care, and Child Protection and Legal Support. The total number served per Region was also obtained in order to assess which Region served the highest number of OVC.

Figure 4: OVC Individuals Served per Region

Source: OVC Database-MGLSD

The highest number of OVC served was registered in Central region with **2,128,983** OVC. This was followed by Eastern and Western regions with **1,104,739** and **1,018,809** OVC respectively. The least number of OVC individuals served was registered in WestNile region with **246,008** (Figure 4). Central Region benefited more in OVC programming over the period July 2017-June 2018 and this was attributed to the high numbers of implementing Partners that provide support to numerous Service providers in the region as compared to other regions with few Implementinbg partners and Service providers' forinstance, WestNile and Karamonja Regions.

3.1.5 OVC Household Supported By Region

This section looks at services offered to OVC HHs by region across the six Core Programme Areas (CPAs) in OVC programming.

Figure 5: OVC Households Supported by Region

Source: OVC Database-MGLSD

Eastern region registered a high number of OVC HHs supported (**398,589**) followed by Central region with **391,624** OVC HHs. The least number of OVC HHs supported was registered in West Nile region (**32,317**) as shown in figure 5. The analysis further revealed that the number of OVC and OVC HHs supported are directly proportional to the number of both Implementing partners and Service providers within the region.

3.1.6 Geographical Distribution of OVC Served per District in the country

The majority of the OVC served are located in the districts of Kabong, Kitgum, Kotido, Kampala, Wakiso, Oyam and Lira among others. On the other hand, districts with moderate number of OVC include Gulu, Nakapiripirit, Tororo, Jinja, Mukono, Mubende, Rakai, Kyotera, Kamwenge and others.

Districts with the least number of OVC registered include; Lamwo, Moyo, Abim, Moroto, Rubirizi, Buhweju, Ibanda, Pakwach and Maracha among others.

[illegible]

Furthermore, making a comparison of the distribution of the OVC on figure 6 and appendix 7 with the number of OVC per district in the UBOS-NHPC 2014 report, the analysis team found out that there is still a big service gap in the OVC Programme. Out of 6,803,070 OVC in the country, only 3,338,854 (49.1%) are benefiting from the OVC programme leaving a service gap of 50.9%.

3.1.7 OVC Supported with three or more Core Programme Areas (CPA) by Sex

The share of OVC supported with three or more Core Programme Areas by sex, results revealed that there were more females (53%) supported with 3 CPA or more compared to their male counterparts (47%). This is attributed to the high enrollement of females on the OVC programme as a result of their escalated levels of vulnerability (figure 6).

Figure8: OVC Supported with three or more Core Programme Areas (CPA) by Sex

Source: OVC Database-MGLSD

3.1.8 HIV Positive Children Supported

Support is given to Orphans and Other Vulnerable Children in Uganda including HIV positive children. These children access appropriate specialized care including HIV counseling services at community level, comprehensive HIV prevention and treatment, care and support services.

The number of HIV positive supported children. Females (53%) were supported more than the males (47%). The number of Females who were HIV positive was higher than that of males due to various social and cultural factors including denial of access to services that only females require, discrimination from service providers stemming from views around female sexuality, poor

quality services and procedures relating to a girl's sexual and reproductive health (SRH). Other reasons include poverty, child neglect, teenage pregnancies and deliveries (Figure 7).

Figure 9: HIV Positive Children supported

Source: OVC Database-MGLSD

3.2 Services Offered

Services are offered to both OVC and OVC Households. These must be under one of the six Core Programme Areas (CPAs); Economic Strengthening, Food Security and Nutritional Support, Health, water, sanitation and Shelter, Education Support, Psychosocial and Basic Care, and Child Protection and Legal Support. In the FY 2017/18, **5,643,654** OVC were provided with services of which **5,052,395** (89.5%) received Social Services like Psychosocial Support and Basic Care, Education, Health, food security and Nutritional support, **165,668** (2.9%) OVC received Economic services and **425,591** (7.6%) OVC were provided with Legal support services.

In addition, **1,389,313** OVC households were also provided with support of which **952,555** (68.5%) HHs were provided with Social services and **436,758** (31.4%) HHs were provided with Economic strengthening.

Further analysis indicates that some OVC and OVC HHs received one or more services from different CPAs implying a higher number of OVC and OVC HHs.

3.2.1 Service Categorization

In this report, OVC programming services to both OVC and OVC HHs were categorized under three areas that is to say Social (Food security & Nutrition, Health, water, sanitation & shelter, Psychosocial support & basic care, and Education Support plus cross cutting indicators), Economic (Economic Strengthening) and Legal services (Child protection & legal support) and the data was analysed by each region across all CPAs.

Table 2: Categorization of OVC Services (Social, Economic and Legal)

Region	Categorization of Services			
	OVC supported with Social services	OVC supported with economic strengthening services	OVC supported with Legal services	Total
Northern	631,063	31,916	47,962	710,941
Western	891,246	31,301	96,262	1,018,809
West Nile	228,133	3,545	14,330	246,008
Eastern	989,132	27,607	88,000	1,104,739
Central	1,922,799	61,213	144,971	2,128,983
Karamoja	390,022	10,086	34,066	434,174
Totals	5,052,395	165,668	425,591	5,643,654

Source: OVC Database-MGLSD

During the period under review, OVC were mainly supported with social services whereas economic and legal services were the least provided (table 2). Service provision is concentrated in social services because this category constitutes the highest number of CPAs in the OVC programme.

Looking at the distribution of services by region, Central Region received the highest of service provision to OVC, followed by Eastern Region, Western, Northern, Karamoja and West Nile Region had the least number of OVC who received services.

This analysis further revealed that OVC service providers seemed to have placed little emphasis on economic strengthening support for OVC households and legal Services and yet these two areas

of support are key drivers to livelihood and Child protection. Therefore emphasis needs to be placed on household economic strengthening as a safeguard to child vulnerability.

OVC Service distribution needs to be re-programmed taking into consideration the poverty levels by region. The distribution of services by region is not consistent with the poverty trends in the country. Services concentrated in the Central and Western Regions yet according to the 2016/17 UNHS, only (12.7%) and (11.4%) respectively of the people are poor, compared to Northern and eastern regions whose poverty levels stood at (35.7%) and (32.5%) respectively.

Table 3: Categorization of HouseHold Services (Social and Economic)

Region	Service categorization		
	OVC HHs supported Socially	OVC HHs supported Economically	Total
Northern	115,538	50,165	165,703
Western	195,598	87,445	283,043
West Nile	22,846	9,471	32,317
Eastern	286,984	111,605	398,589
Central	249,906	141,718	391,624
Karamonja	81,683	36,354	118,037
Totals	952,555	436,758	1,389,313

Source: OVC Database-MGLSD

Looking at the distribution of Social and Economic services given to HHs by region, a total of 1,389,313 HHs were served, of which 952,555 received social services and 436,758 received economic services. Eastern Region (398,589) had the greatest number of HHs served followed by Central Region (391,624). The least number of HHs served were from West Nile Region (32,317).

3.2.2 Household support and OVC service provision per CPA by Region

Under this section, the analysis team looked at specific support given to the individuals per CPA and OVC HHs supported by region. The results are as displayed in the following tables (4-9).

Table 4: OVC Served and Households Supported in Northern Region

	CORE PROGRAM AREAS	Specific support given	Individuals Served		Totals	OVC Households Supported
REGION	Economic Strengthening	Economic strengthening				50,165
Northern			Male	Female	Totals	
		Vocational training skills	11,066	12,633	23,699	
		Received tool kits	3,780	4,437	8,217	
	Food security & Nutrition	Agriculture Inputs(HH)				20,636
		Food (HH)				4,765
		Nutritional support	19,005	20,042	39,047	
		Agriculture Advisory services				26,295
	Health, water, sanitation & shelter	Safe Water				20,212
		Provision of Health Services	34,461	41,449	75,910	
		Insecticide Net provision	6,505	6,978	13,483	
		OVC (HH) provided with Shelter				3,630
	Education Support	Education Support(scholastic items)	80,085	87,028	167,113	
	Psychosocial support & basic care	Psychosocial support	136,904	145,170	282,074	
		Basic care	11,294	12,019	23,313	
	Child protection & legal support	OVCs Re-Integrated with their families	1,066	1,257	2,323	
		OVC withdrawn from Child Labour	862	794	1656	
		OVC assisted to register Birth	12,644	12,630	25,274	

		Child abuse and neglect cases handled	9,202	9,507	18,709

		OVC supported to Access HIV Services	8,705	12,109	20,814	
Total			339,843	371,098	710,941	95,703

Source: OVC Database-MGLSD

The total number of OVC served in Northern Region was 710,941. Of these, females benefited more with 52.2% compared to the males that stood at 47.8%. The total number of households that were supported were 95,703 (Table 4).

Table 5: OVC Served and Households Supported in Western Region

	CORE PROGRAM AREAS	Specific support given	Individual Served		Totals	OVC Households supported
REGION	Economic Strengthening	Economic strengthening				87,445
Western			Male	Female		
		Vocational training skills	9,794	12,541	22,335	
		Received tool kits	5,031	3,935	8,966	
	Food security & Nutrition	Agriculture Inputs(HH)				28,761
		Food (HH)				36,510
		Nutritional support	29,381	33,147	62,528	
		Advisory services (HH)				44,472
	Health, water, sanitation & shelter	Safe Water (HH)				49,179
		Provision	46,603	51,423	98,026	
		Health Services				
		Insecticide Net provision	14,067	15,606	29,673	
		OVC (HH) provided with Shelter				7,915

	Education Support	Education Support(scholastic items)	109,664	120,591	230,255	
	Psychosocial support & basic care	Psychosocial support	164,731	170,608	335,339	
		Basic care	36,724	38,992	75,716	
	Child protection & legal support	OVCs Re-Integrated with their families	5,400	5,384	10,784	
		OVC withdrawn from Child Labour	1,527	1,789	3,316	
		OVC assisted to register Birth	19,369	20,554	39,923	
		Child abuse and neglect cases handled	20,685	21,554	42,239	
	Cross cutting indicators under Health	Number of OVC HIV + Supported	8,296	9,327	17,623	
		Number of OVC supported to Access HIV Services	21,347	20,739	42,086	
	Total		492,619	526,190	1,018,809	254,282

Source: OVC Database-MGLSD

The total number of OVC served in all CPAs was 1,018,809. Of these, 51.6% were females whereas 49.4% were males. The total number of households that were supported measured up to 254,282 across all the CPAs (Table 5).

Table 6: OVC Served and Households Supported in Westnile Region

	CORE PROGRAM AREAS	Specific support given	Individuals Served		Totals	OVC Households supported
REGION	Economic Strengthening	Economic strengthening				9,471
West Nile			Male	Female		
		Vocational training skills	996	1,280	2276	
		Received tool kits	1,010	259	1,269	
	Food security & Nutrition	Agriculture Inputs(HH)				8,410
		Food (HH)				1,954
		Nutritional support	8,863	9,561	18,424	
		Agriculture Advisory services (HH)				9,663
	Health, water, sanitation & shelter	Safe Water (HH)				2,746
		Provision	6,758	7,747	14,505	
		Health Services				
		Insecticide Net provision	5,738	5,749	11,487	
		OVC (HH) provided with Shelter				73
	Education Support	Education Support(scholastic items)	21,155	21,218	42,373	
	Psychosocial support & basic care	Psychosocial support	62,961	60,877	123,838	
		Basic care	4,415	4,473	8,888	
	Child protection & legal support	OVCs Re-Integrated with their families	385	395	780	
		OVC withdrawn from Child Labour	811	395	1, 206	
		OVC assisted to register Birth	3,969	4,093	8,062	

		Child abuse and Neglect cases handled	2,055	2,227	4,282	
	Cross cutting indicators under Health	OVC HIV + Supported	1,165	1,966	3,131	
		OVC supported to Access HIV Services	2,655	2,832	5,487	
Total			122,936	123,072	246,008	32,317

Source: OVC Database-MGLSD

Total number of OVC served was 246,008. Of these, 50% were males and 50% were also females. Only 32,317 households were supported. The analysis reveals that West Nile region registered the least number of both OVC served and OVC households supported (Table 6). This was because of few service providers within the region (47) compared to other regions like Western Region with over 320 service providers and Central region (over 400).

Table 7: OVC Served and Households Supported in Central Region

	CORE PROGRAM AREAS	Specific support given	Individuals Served		Totals	OVC Households Served
REGION	Economic Strengthening	Economic strengthening				141,718
Central			Male	Female		
		Vocational training skills	20,828	33,418	54,246	
		Received tool kits	2,375	4,592	6,967	
	Food security & Nutrition	Agriculture Inputs(HH)				41,611
		Food (HH)				34,687
		Nutritional support	91,521	98,208	189,729	
		Agriculture Advisory services				99,290
	Health, water, sanitation & shelter	Safe Water				69,402
		Provision Health Services	134,609	168,220	302,829	

		Insecticide Net provision	20,091	20,894	40,985	
		OVC (HH) provided with Shelter				4,916
	Education Support	Education Support(scholastic items)	151,088	161,783	312,871	
	Psychosocial support & basic care	Psychosocial support	362,507	422,377	784,884	
		Basic care	41,655	41,964	83,619	
	Child protection & legal support	OVC Re-Integrated with their families	4,700	5,352	10,052	
		OVC withdrawn from Child Labour	3,413	4,074	7,487	
		OVC assisted to register Birth	43,529	48,391	91,920	
		Child abuse and Neglect cases handled	16,651	18,861	35,512	
	Cross cutting indicators under Health	OVC HIV + Supported	28,539	32,726	61,265	
		OVC supported to Access HIV Services	62,617	84,000	146,617	
	Total		984,123	1,144,860	2,128,983	391,624

Source: OVC Database-MGLSD

Total number of OVC served was **2,128,983**. Of these, 46.3% were males and 53.7 % were females. **391,624** households were supported. The analysis reveals that Central region registered the highest number of both OVC served and the second highest number of OVC households supported (Table 7). This was because of the big number of service providers (over 400) operating within the region.

Table 8: OVC Served and Households Supported in the Eastern Region

	CORE PROGRAM AREAS	Specific support given	Individuals Served		Totals	OVC Households supported
REGIONS						
Eastern	Economic Strengthening	Economic strengthening				111,605
			Male	Female		0
		Vocational training skills	8,120	9,753	17,873	0
		Received tool kits	4,923	4,811	9,734	0
	Food security & Nutrition	Agriculture Inputs(HH)				71,232
		Food (HH)				42,032
		Nutritional support	35,876	36,541	72,417	0
		Agriculture Advisory services (HH)				72,472

						0
		Health Services	58,202	65,650	123,852	
		Insecticide Net provision	13,631	14,491	28,122	0
		OVC (HH) provided with Shelter				2,395
	Education Support	Education Support(scholastic items)	112,381	119,254	231,635	0
	Psychosocial support & basic care	Psychosocial support	192,661	200,508	393,169	0
		Basic care	43,000	45,145	88,145	0
	Child protection & legal support	OVCs Re-Integrated with their families	3,891	3,955	7,846	0
		OVC withdrawn from Child Labour	6,242	5,310	11,552	0
		OVC assisted to register Birth	13,686	14,849	28,535	0
		Child abuse and Neglect cases handled	18,970	21,097	40,067	0

	Cross cutting indicators under Health	OVC HIV + Supported	7,144	7,910	15,054	0
		OVC supported to Access HIV Services	18,048	18,690	36,738	0
Total			536,775	567,964	1,104,739	398,589

Source: OVC Database-MGLSD

The total number of OVC served in all CPAs was **1,104,739**. Of these, 51.4% were females whereas 48.2% were males. The total number of households that were supported measured up to **398,589** across all the CPAs and this was the highest registered number of OVC HHs supported in all the regions (Table 8).

Table 9: OVC Served and Households Supported in Karamoja Region

	CORE PROGRAM AREAS	Specific support given	Individuals Served		Totals	OVC Households Supported
REGIONS	Economic Strengthening	Economic strengthening				36,354
			Male	Female		0
Karamoja		Vocational training skills	2,996	3,494	6,490	0
		Received tool kits	2,152	1,444	3,596	0
	Food security & Nutrition	Agriculture Inputs(HH)				17,410
		Food (HH)				17,140
		Nutritional support	61,883	71,424	133,307	0
		Agriculture advisory services (HH)				19,642
	Health, water, sanitation & shelter	Safe Water Provision (HH)				26,920
			17,850	21,940	39,790	0
		Health Services				
		Insecticide Net provision	3,076	3,334	6,410	0

		OVC (HH) provided with Shelter				571
	Education Support	Education Support(scholastic items)	46,823	47,842	94,665	0
	Psychosocial support & basic care	Psychosocial support	31,843	37,453	69,296	0
		Basic care	11,867	13,931	25,798	0
	Child protection & legal support	OVCs Re-Integrated with their families	2,025	2,513	4,538	0
		OVC withdrawn from Child Labour	2,113	1,558	3,671	0
		Child abuse and Neglect cases handled	6,938	8,182	15,120	0
		OVC assisted to register Birth	5,206	5,531	10,737	0
	Cross cutting indicators under Health	OVC HIV + Supported	2,820	3,147	5,967	0
		OVC supported to Access HIV Services	7,384	7,405	14,789	0
Total			204,976	229,198	434,174	118,037

Source: OVC Database-MGLSD

Total number of OVC served in karamonja region was **434,174**. Of these, 47.2% were males and 52.8% were females. Only **118,037** households were supported. The analysis revealed that Karamoja Region registered one of the least number in both OVC served and OVC households supported after West Nile Region that registered the least overall (Table 10). Karamoja is a hard to reach area and thus had few numbers of service providers within the region compared to Western and Central Regions that had over 300 service providers each.

3.2.3 Implications of the OVC Services (Conclusive Remarks)

Looking at the distribution of the services offered to the OVC and OVC households, it can be noted that the services were more skewed towards the provision of social services as opposed to economic and legal services. The provision of OVC services such as food and basic requirements and Psycho-social support is not sustainable overtime to the OVC and therefore there is need to strike a balance and see how to support other areas.

The analysis indicates that whereas each service provider implemented at least 3 CPAs, some CPAs were implemented more than others. The most implemented CPA was Psychosocial Support and Basic care, undertaken by most of the service providers, followed by Education and health, water and sanitation respectively. Food security and nutrition, economic strengthening were undertaken by almost same proportion of service providers, while the least implemented CPA was child protection and legal support.

The distribution of services by Region to the OVC has a direct impact on vulnerability of the OVC in the region. Regions that received more OVC programming services such as Central and Western, had more children graduating out of the OVC programme and their levels of poverty reducing compared to North and Eastern regions that received less OVC services.

3.3 Graduation in OVC program

Under the OVC implementation programme, an OVC is not supposed to remain benefitting from a particular service for ever. Therefore the support services given to them are supposed to propel them to be able to sustain themselves after graduating and exiting from the programme after a given period of time.

3.3.1 OVC who Graduated by sex

During the period under review, 46.8% males and 53.2% females were graduated which is consistent with statistics from UBOS as shown in figure 8 below.

Figure 7: OVC who graduated by sex

Source: UBOS (UNHS 2016/17)

3.3.2 OVC who graduated by Region

The South Western Region registered the highest number of graduates at **(20,359)**, followed by Western Region with **17,105** OVC and Central with **16,875**. The North East region had the lowest number of OVC who graduated (**1,453**). This is possible because of the high levels of poverty in Northern (32.5%) and Eastern (35.7%). This has forced the Vulnerable and Poor children in these regions to stay longer in OVC programme compared to the other regions such as western (11.4%) and Central (12.7%) where poverty levels are relatively lower (Source: UNHS 2016/17).

Figure 8: OVC who graduated by Region

Source: UBOS (UNHS 2016/17)

4.0 CHAPTER FOUR:

This chapter presents challenges that were encountered during the reporting period. It also highlights recommendations for the betterment of OVC service delivery and programming.

4.1 Challenges

A number of challenges affect effective response, strategy implementation as well as full functionality of OVCMIS. These inadequacies affect the quality of service delivery as well as the validity of data. Challenges observed during the analysis generally included the following:

- I. The OVC individuals served do not have unique identification numbers and this makes tracking of these individuals across the service delivery points difficult, hence double counting may not easily be avoided
- II. Data collected largely lacked sufficient details. It was not disaggregated by disability. This is compounded by the element of multiple counting of a child by service points. Some Data collected is incomplete as indicated by the OVC database. Most files were lacking complete lists of eligible beneficiaries, variables and service delivery points.
- III. Lack of integrity in data management: OVCMIS is not immune to deliberate bias and manipulation for partisan reasons at district level. Passwords could be accessed easily and used for personal benefits. Additionally, there are cases where OVC service providers are deliberately deactivated to reflect 100% reporting rate. However, this is hoped to be addressed with the enhancements in OVCMIS.
- IV. OVC Annual reports had a reporting gap for the period 2016/17 and even the produced OVC annual reports for 2014/15 and 2015/16 were shared only with the TWGs and not all other stakeholders.
- V. Cases of none or late reporting by some CSOs.

4.2 Recommendations

- I. Poverty being more prevalent in the Northern, West Nile, and Karamoja regions, there is need to provide more OVC programming services in these regions to reduce child vulnerability.
- II. The analysed data revealed that OVC service providers seemed to have placed little emphasis on economic strengthening support for OVC households and legal Services and yet these two areas of support are key drivers to livelihood and Child protection. Therefore emphasis needs to be placed on household economic strengthening as a safeguard to child vulnerability.
- III. Data collection processes should be strengthened to allow capture of disaggregated data by disability.
- IV. Districts should be discouraged from deactivating some service providers in their districts that do not report in time, or do not report at all. They should be encouraged to take other punitive measures against such culprits. The CAOs office should be engaged to write warning letters to such service providers to make them comply. Otherwise, the act of deactivating them will not provide the data that they are sitting on but will further contribute to under reporting and loss of data that would contribute to planning and decision making.
- V. The process and introduction of Case Management into OVC programming needs to be expediated. Moving from long-term support and service provision to a strength-based, resilient-focused approach will be of paramount importance because it focuses on outcomes and not inputs. The Case Management of OVC programs will go a long way into demonstrating the impact on OVC and their families.
- VI. There is need to work with NIRA to have all the OVC registered and provided with NINs
- VII. Reports produced should be disseminated to all the stakeholders to generate a shared position and stimulate actions in OVC programming. All possible modes including electronic media, e-mails, posting on OVC website, briefer on national gazette and dissemination meetings need to be used to disseminate the reports. The reports should inform the national planning cycle to enlist data use in decision making in OVC programming.
- VIII. More OVC need to be registered and enrolled into the OVC program as comparative statistics from the NHPC 2014 shows that the country has many more orphans than the number depicted and being served under the OVC programme.

Appendices:

Glossary	
Caregiver	The individual, who takes primary responsibility for the physical, mental and emotional needs and well-being of a child.
Basic care	Provision of basic physical, cognitive and psycho-social needs of OVC and their caregivers.
Capacity building and resource mobilization	A process by which the ability of individuals, households, community and organizational capacity is improved in order to deliver adequate care, support and services to orphans and other vulnerable children.
Child	A person who is below the age of 18 years.
Community	A group of people, usually living in an identifiable geographical area, who share a common culture, and are arranged in a social structure that allows them to exhibit some awareness of a common identity as a group, often referred to as a village and administratively categorized as local council (LC1). In this report, community is also used in reference to a group of villages in parish (LC2) or a sub-county (LC3). These two levels represent a functional basis for OVC programme development, for example; through Parish Development Committee, Sub county Council and the sub-county development programme.
Child protection and legal protection	Ensuring that all OVC are safe from risk and hazard resulting from violation of their rights; and that any infringement on such rights is promptly recognized, reported, stopped and punished.

Core Programme Areas (CPAs)	These are programme areas that have been identified during the NOP and NSPPI development process as being essential to the well-being of OVC. They include economic strengthening; food and nutrition security; health, water, sanitation and shelter; education; psychosocial support and basic care; child protection and legal support and; legal, policy and institutional mechanisms.
Disability	Substantial functional limitation of daily life activities of an individual caused by physical, sensory or mental impairment and environmental barriers.
Education	Ensuring that OVC access primary and secondary education, and appropriate business, technical and vocational training to enable them realize full productive potential.
Functional OVC MIS	Refers to timely collection of accurate data that is accurate, reliable, precise, complete with utmost integrity and confidentiality, reported through OVC MIS and used for planning and decision making in favour of improving access to comprehensive and quality services among OVC households.
Health	Ensuring that all OVC have access to the Uganda National Minimum Health Care Package as provided for in the National Health Policy.
Food and nutrition security	All households have necessary capacity to produce or procure adequate and appropriate foods and, all household members have a balanced diet at all times
Household	A group of people who normally live and eat together in one spatial unit and share domestic functions and activities.

Orphan	A child below the age of 18 years who has lost one or both parents.
OVC stakeholders	The different categories of people, institutions, agencies and groups with an interest in the well-being of OVC. Such parties exist at different levels such as community, district, national or global. The interest and contribution to OVC welfare are usually different for each stakeholder, and may change with time and/or different kinds of vulnerability.
Psychosocial support	Ensuring that families and communities are enabled to provide necessary emotional and social support to OVC as an integral element in all child care and development services. All actions that enable orphans and other vulnerable children to foster resilience and reach their full potential in life.
Quality	In the context of OVC services, quality refers to the degree to which the cluster of services provided to children, families, and communities maximizes benefits and minimizes risks, so that children may grow and develop. Quality care means that children, families, and the community receive all needed services and no unnecessary services. Quality care implies the correct mix of services for each child, family, and community and is based on current best practices and indigenous and expert knowledge. Children, families, and communities play a leadership role in decisions about the care and services they receive.
Economic strengthening	Ensuring that all families living with OVC have the necessary resources to cater for the needs of all OVC and other household members
Vulnerability	A state of being in which a person is likely to be in a risky situation, suffering significant physical, emotional and/ or mental harm that may result in their human rights not being fulfilled.

vulnerability index	The vulnerability index of an individual OVC is a measure of the exposure of ovc population to their inability to provide for themselves basic necessities of life. Typically, the index is a composite of multiple quantitative indicators that via some formula, delivers a single numerical result
